Event Summary

Building decarbonization from an owner's perspective involves navigating challenges such as upfront costs, regulatory compliance, and market demands, while also seizing opportunities such as increased property value, operational efficiency, and long-term sustainability. Owners must balance financial considerations with environmental responsibility to achieve both short-term gains and long-term benefits for their properties and the planet.

**K. William (Bill) Dean, P. Eng.
Distinguish Lecturer - ASHRAE**

Bill Dean, P.Eng. who has retired from the National Research Council of Canada where he was the Western Regional Site Operations Manager. In that capacity he was responsible for the operations of NRC's big science facilities in Western Canada. Bill is a past Vice President of ASHRAE, where he had three terms on the Board of Directors as DRC, DAL, and VP. He has chaired numerous standing committees, technical committees, and standards project committees.

Bill was responsible for the production of 5 ASHRAE publications covering existing Building Commissioning, Cold Climate Buildings Design and Designing for Operational Excellence, which was Daryl Boyce's Presidential theme publication. Bill has recently spoken at the International Decarbonization Conference in Athens, Greece; The Decarbonization Fundamentals Webinar for the New York City ASHRAE Chapter and the SCANVAC – ASHRAE HVAC Cold Climate Conference in Anchorage, AK.

Please use registration link below and the promo code for our London chapter members to register at \$85 for April 8 DL dinner. Promo Code: **HQD5Q5NC**
