ONTARIO HOGS - HARVEY 01

ONTARIO SETS NEW EFFICIENCY STANDARDS

Agriculture and Food, says the province's new hog efficiency standards will help the hog industry improve its productivity and competitiveness.

The new standards, which are based on the performance of the hog industry in Canada and other countries, will require producers to meet certain standards for productivity, efficiency, and environmental impact. Producers who meet the standards will receive a production credit, while those who do not will face penalties.

The standards will come into effect in 2023 and will be reviewed every five years. They are part of the province's broader strategy to support the hog industry and maintain its competitiveness in the global market.

ONTARIO CENTER OF EXCELLENCE

The Ontario Center of Excellence is a hub for innovation and collaboration in the province's food industry. It brings together researchers, farmers, and industry leaders to tackle challenges and develop new solutions.

The center focuses on areas such as crop and animal health, food safety, and sustainable production practices. It also supports the development of new technologies and processes to improve efficiency and reduce waste.

The center is funded by the provincial government and is managed by a partnership of industry and academic stakeholders. Its activities include research, training, and outreach programs that are designed to help farmers and processors alike.

ONTARIO PROGRAM

This month's program features a special segment focusing on the province's role in food security and sustainability. We will be highlighting the latest developments in this important area and exploring the challenges and opportunities that lie ahead.

Don't miss the opportunity to learn more about this critical issue and the steps that are being taken to address it. Stay tuned for more information in our upcoming broadcasts.
