HIGHLAND GOLF & COUNTRY CLUB
279 Commissioners Rd. E., London, Ont.

Monday, February 22nd, 1982

Social Hour — 5:30
Dinner — 6:30

Guest Speaker

MR. D. A. (DAVID) DRINKWALTER
Deputy Director of Western Region
For Ontario Hydro

**SUBJECT: ENERGY ISSUES OF TODAY AND
THEIR IMPLICATIONS FOR THE FUTURE**

Supporting Research

Research is the core of ASHRAE's existence. The need for a research project is identified by the public, the industry, or the membership itself—practicing professionals. Funding is obtained through contributions solicited by ASHRAE members and by income generated by an industry exposition held in conjunction with the Society's semi annual meeting.

Every dollar collected for ASHRAE Research is expended on research projects. Cost sharing programs with outside sources like government and trade associations accelerate and expand research efforts in areas of vital interest to the public. As an example, much of ASHRAE's recent research work has been done in the area of energy conservation.

At any given time, about two dozen research projects are being conducted under ASHRAE's auspices. These projects are carried out by research organizations, colleges and universities, and consulting engineers. Completed studies cover subjects like air contamination levels in parking garages, ventilation requirements in operating rooms, the impact of illumination on heating and cooling loads in buildings, and wind-related collector heat loss in solar heating and cooling systems. It is the largest program of fundamental and applied research supported by a technical society.

The ultimate goal of ASHRAE Research is to provide useful information. This is achieved through the presentation of research findings at Society meetings and their publication in *ASHRAE Transactions*, in chapters of the *ASHRAE Handbook*, and in research bulletins.

Seminar

FIRE & SMOKE IN HI-RISE BUILDINGS

ASHRAE - Toronto Chapter will present an afternoon and evening technical seminar on this topical subject. They have arranged for a group of highly qualified individuals to present papers and participate in a panel discussion on fire and smoke in hi-rise non-residential buildings.

The cost of the seminar is \$40.00, including dinner. For further details call R. R. King at (416) 592-3870 or R. D. Stublely at (416) 224-4164.

☆☆☆☆

"I make it a point never to lend money. It ruins a friendship."

"Don't worry. We never were really good friends."

The campus carillon was playing. "Beautiful, isn't it?" he asked.

"Pardon?" she asked.

"I said the music is beautiful," he repeated.

"You'll have to speak louder," she shouted. "I can't hear a thing but those lousy chimes."

"What is yellow, weighs 1,500 pounds and sings?"

"I give up."

"Two 750-pound canaries."

Reporter: If you had your life to live over, would you make the same mistakes?

Octogenarian: Yes, but I'd start sooner.

"How do you mean their marriage was a case of mumbles?"

"Well, the minister mumbled a few words in their ears and they were married. Later the husband mumbled a few words in his sleep and they were divorced."

"Daddy, give me a dime and I'll tell you what the ice man said to Mommy."

"Okay, here's the dime. What did he say?"

"He said, 'Do you want any ice today, lady?'"

She: Will you love me when I'm old?

He: Love you? I shall . . . you're not going to look like your mother, are you?

"And he said he was an expert on air pollution!"
