Re: Ashrae Dinner Meetings

Dear Mr. Glendon:

We would like to confirm your meeting schedule for the upcoming year.

The dates tentatively reserved for the Ashrae Dinner Meetings are as follows:

- Monday, September 28, 1992
- Monday, October 26, 1992
- Monday, November 30, 1992
- December 1992 - No meeting
- Monday, January 25, 1993 (Not available)
- Tuesday, January 26 or Monday February 1, 1993 (Please confirm)
- Monday, February 22, 1993
- Monday, March 29, 1993
- Monday, April 26, 1993
- Monday, May 31, 1993
- June 1993 - No meeting

The inclusive price per person will be \$18.35, including meal, 7% GST, 8% PST and 15% service charge.

At your earliest convenience we would appreciate confirmation of the above dates.

Kindly confirm with me if the mailing address for the Treasurer should change.

We look forward to accommodating your group once again.

Yours truly,

Wendy Decarie

LONDON CHAPTER**12 December 1992**

**The Honourable Bob Rae
Premier of Ontario
Room 281, Legislative Building
Queen's Park
Toronto, Ontario
M7A 1A1**

**The Honourable Marilyn Churney
Minister of Consumer and Commercial Relations
9th Floor, 555 Yonge Street
Toronto, Ontario
M7A 2H6**

Dear Premier and Minister,

RE: BILL TO AMEND THE OPERATING ENGINEERS ACT

The American Society of Heating, Refrigerating and Air Conditioning Engineers Inc. (ASHRAE) is an international technical society which is recognized as the world's leading depository of technology related to heating, refrigeration and air conditioning.

Its 50,000 plus individual members include consulting engineers, design professionals, contractors, employees of manufacturers, testing laboratories, research and educational institutions and all levels of government. In Ontario there are about 1,600 ASHRAE members.

The London Chapter of ASHRAE has long awaited introduction of the bill to amend the OEA and anticipated its introduction in the fall 1992 legislative session. We learned recently that the bill to amend the Act is unlikely to be introduced in either the fall 1992 or the spring 1993 sessions owing to a crowded legislative agenda., We also understand that, although a draft bill was recently made public, an early target date for introduction is extremely doubtful.

CHAPTER MAY NOT ACT FOR SOCIETY

This news disappoints ASHRAE - London Chapter members who take responsibility for selecting, purchasing, installing and operating refrigeration equipment. For numerous reasons described below, we feel the Government should expedite introduction of the bill to amend the OEA and its Regulation.

Reasons to Expedite Making Amendments to the OEA and its Regulation:

- 1) Because of worldwide concern with the deteriorating environment and specifically, the thinning ozone layer, the most common refrigerants in use worldwide today are being phased out at an accelerated pace to meet the objectives of the United Nations' Montreal Protocol. The original target date for a total ban on CFC production was 2000; this is now advanced to 1997.

Uncertainty about the OEA is hindering the withdrawal of these refrigerants from service in Ontario.

- 2) The current OEA requires different design conditions and operating procedures for high and low pressure refrigeration plants depending on installation size.

Our industry is pleased with the proposed bill recently released by the Minister. We will assess how operating procedures and refrigeration plant design are affected and will forward any questions we may have to MCCR.

Until the legislation is amended to update requirements, building owners (investors) continue to be unwilling to invest in or make firm commitments on replacing or modifying existing refrigeration plants to permit the use of non-CFC or ozone-friendly refrigerants with low global warming potential.

- 3) Ontario is one of the few North American jurisdictions requiring attended operation of high pressure refrigeration equipment utilizing non-CFC refrigerants.
- 4) The Minister of the Environment announced recently that a draft Environmental Bill of Rights will be introduced after a period of public consultation. This is laudable.

However the present OEA, which inhibits the use of some environmentally benign refrigerants, would seem to not comply with - or at least, fail to be in keeping with - the spirit of the proposed bill.

- 5) MCCR staff worked diligently for many years to update the OEA and achieve consensus among diverse industry stakeholders including building owners, equipment manufacturers, refrigerant suppliers, organized labour and consulting engineers.

In consideration of exceptional work and general satisfaction by all parties, the Government should move aggressively to amend the legislation.

- 6) Any political concerns the Government may have for not proceeding with introduction of the bill to amend the OEA are overshadowed by worsening environmental conditions and public awareness of the issue.

On behalf of the London Chapter of ASHRAE, I urge the Premier and the Minister of Consumer and Commercial Relations to champion this cause by repositioning the bill on the Government's agenda for introduction in the spring 1993 session.

A clear direction for the OEA eliminates the uncertainty that has immobilized industry action to date. With a direction, our industry can respond with solutions that are safe for the environment and safe for users of the equipment as required by the OEA.

I look forward to your comments and views on expediting this matter.

Yours truly,

Owen R. Glendon, P.Eng.

Attention: Owen Glendon

Dear Owen,

Enclosed is a copy of a letter sent to the Premier, The Minister of Consumer and Commercial Relations, and the Minister of the Environment concerning the Operating Engineers Act of Ontario.

It would be helpful in obtaining action on this subject if you were to mail an ammeded copy of this letter to the above Ministers substituting your Chapter name where appropriate. Please encourage your Chapter Members to send letters of their own to these Ministers as well as to their local M.P.P.

Yours truly,

LONDON CANADA CHAPTER / 521 COLBORNE ST. / LONDON, ONTARIO N6B 2T6

28 April 1993

FAXED

Dr. Rosemarie Jaco
Department of Social Work
King's College
266 Epworth Avenue
LONDON, Ontario
N6A 2M3

Dear Dr. Jaco:

I was very pleased to hear that you will be able to join us on 31 May 1993. The membership is keen to have you as our guest speaker.

Our volunteer organization is comprised of design consultants, equipment suppliers, construction contractors and building owners and operators. Our main objective is to gain knowledge to provide livable buildings. We rely heavily on one another to create an acceptable product. However, the manner in which we relate through the competitive process is very adversarial. Many of us are competitors, and in today's limited market are struggling to survive.

As you are probably aware, the need to provide buildings on time and on budget is intense. Once a building owner has made the commitment to spend, he or she expects the returns on their investment as soon as possible.

Yes, I would say that stress is a part of our daily lives. We look forward to hearing your suggestions on the management of stress.

The meeting will be held at the Highland Country Club Ltd., 279 Commissioners Road East. We usually meet at 5:30 p.m. for about an hour socially. Supper and a short business meeting run to about 7:30 p.m. Our guest speakers usually have the floor from about 7:45 p.m. to 8:45 p.m.

If you need a slide or overhead projector or VCR/TV, please call me at your leisure.

I am looking forward to meeting you.

Yours sincerely,

Owen R. Glendon, P.Eng.

Dear Candy:

The Committee Members of ASHRAE recognize and are thankful for the prompt turnaround and issuing of our newsletters each month. We also recognize your fees are very competitive.

However, we were very disappointed in the quality of this year's roster. The cropping is obviously skewed and the printing darkness and alignment is inconsistent. Also, the cover material is not very substantial.

Candy, it is possible that we are not leaving you enough time to prepare the work, or have we not indicated that a higher quality binding and cover (and associated higher cost) would probably be acceptable?

Please let me know what you feel we can do to improve the look, feel and maybe even content of our roster and newsletters. Your help would be appreciated.

Yours sincerely,

Owen R. Glendon, P.Eng.
