presentations.*

Research Promotion

The research committee has a big job ahead of it this year, the London goal is \$8200.00 and I will be looking for assistance soon. We have collected about \$600.00 thus far this year and I hope this is a good sign of things to come. At a future meeting we will honour some of last years contributors, they will receive a donor recognition Date Bar or Plaque/Coin.

I hope you will be able to join us in honouring Chorley & Bisset Ltd., Trane Sales, Union Gas Ltd. Chatham, Abram Refrigeration and Systems, Drennan Refrigeration Inc., Glover Hill Inc., and JMR Electric Ltd. who each has donated \$250.00 or more.

In Canada, we invest approximately \$125,000 per year into ASHRAE Research and in turn receive approximately \$1,000,000 in research grants. One such grant this year came to a research project at the University of Western Ontario. It is quite apparent that Canada receives a significant return on your investments in ASHRAE Research, and we can be proud of this achievement.

President's Message

Those of you who keep a close eye on the program schedule for the Chapter will note that there has been a change in the program for February. Due to conflicting commitments, our original February speaker is now scheduled for April. We were delighted to secure Dennis Banning on short notice. Dennis has extensive experience in fan manufacturing and sales. His background with both AMCA and ASHRAE should make for a particularly interesting evening.

Please take note of the Technical Session scheduled between 5:30 pm and 6:00 pm, just prior to dinner. We hope to hold such technical sessions on a more regular basis. Half hour technical discussions can be a great way to promote debate and understanding within the membership.

I am delighted to report that the executive position of Historian has been filled. Don Johnson, a past president, has agreed to take on this position. I know that Don's meticulous nature will be valuable in this role,

TECHNICAL SESSION

Come early for the meeting on 23 February. The AMCA video "System Effect - Optimum System Performance", will run during the social hour. We anticipate running this 12 minute video, a couple of times between 5:30 pm and 6:00 pm. It's an excellent opportunity to socialize, learn a little and debate the finer points of the issues with your peers.

TABLETOP DISPLAY - SMITH ENERGY

Smith Energy of Kitchener will host a tabletop display at our February 23rd meeting. David Smith will feature direct contact water heaters (100% efficient) by Ludell, as well as lines of boilers by both Bryan and Patterson & Kelley. Please take a few minutes during the meeting to check out David's material.
