Guest Speaker

Glen Greer

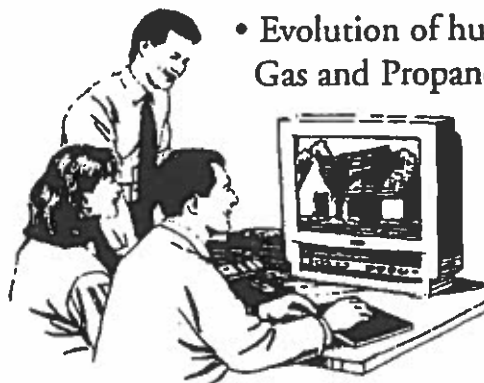

Regional Sales Manager

Nortec Industries Incorporated

Mr. Glen Greer is the Regional Sales Manger, Northern Territory, for NORTEC Industries. He has been with NORTEC for almost nine years, having joined the firm in the Technical Services Department. He became supervisor for application, troubleshooting and warranty considerations for all product lines. In addition, he has been involved with numerous design modifications and improvements to product lines, and was a primary contributor in achieving NORTEC's ISO Certification. He continues to be an Internal Quality Auditor for the ISO 9001-1994 Quality System. Glen's strong technical background assists well in field engineering support.

Topic for Discussion

• Evolution of humidity systems to Gas and Propane

• Advantages and design considerations of Gas and Propane humidifiers

A meeting not
to be missed!

Student Activities

As in the past years the London ASHRAE Chapter is continuing a close relationship with the senior engineering students at U.W.O. and the active ASHRAE Student Branch. Presentations have been made to both the Third and Fourth year Mechanical Engineering students in an attempt to introduce them to ASHRAE. To date approximately 15 students have applied for student membership. We were pleased to welcome several students to the November meeting.

Based on the highest mark in the Third year Thermodynamics course in the 1996/1997 academic year, Dave Brown on behalf of the London Chapter has awarded a student membership and Fundamentals handbook.

During the first academic term the London ASHRAE Chapter arranged for a tour of One London Place as well as a technical seminar for the fourth year students.

ASHRAE sponsors a student design project annually to recognize outstanding student design projects. The categories for this competition are: Architectural System Design, HVAC System Design and Primary Equipment System Design. Brenda Stonehouse is working with a group of Fourth year students on an entry in the HVAC system desing category.

During the second term a an additional tour is planned as well as a second technical session. Any suggestions or volunteers for these sessions would be appreciated.

Lindsay Hird

Student Activities Chair

President's Message

By this time, we have all had a chance to dig into the new year's work. I hope that everyone had a good holiday.

Our December ASHRAE event was a night at Western Fair where 18 of us dined among friends and most of us managed to lose a few dollars on the horse racing. Although I'm not aware of any big winners in the group, it was a fun evening all around.

January is the time of the ASHRAE Winter Meeting in San Francisco. Those travelling to the meeting from our chapter include Darryl Boyce, John Bisset and Owen Glendon. They ought to be well primed for our chapter meeting the following week.

We continue to develop the new newsletter format. Scott Turner has done a great job setting it up and refining it. It looks great and it costs less too.

I hope to see you out on January 26. Gas-fired humidifiers represent a relatively new technology which can produce significant operating savings. It's a timely topic, especially for January.
