

ASHRAE Meeting London, Ontario

Environmental Controls for Indoor Cannabis Cultivation

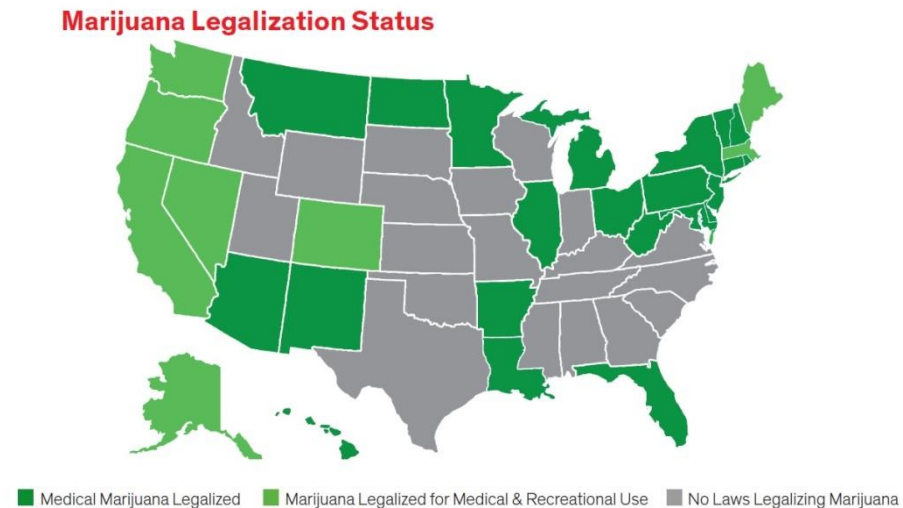

2017

What Has Been Happening to the South

- Currently 29 states, 3 indigenous nations, and the District of Columbia have legalized medical cannabis
- Currently 8 states have legalized recreational cannabis
- Federally all is still illegal

Current Legal Status in Canada

- Cannabis (marijuana) remains a Schedule II drug under the Controlled Drug and Substances Act, and, unless otherwise regulated for production and distribution for medical purposes, is subject to offences under that Act.
- Possessing and selling cannabis for non-medical purposes is still illegal everywhere in Canada.

Pending Legal Status in Canada (Recreational)

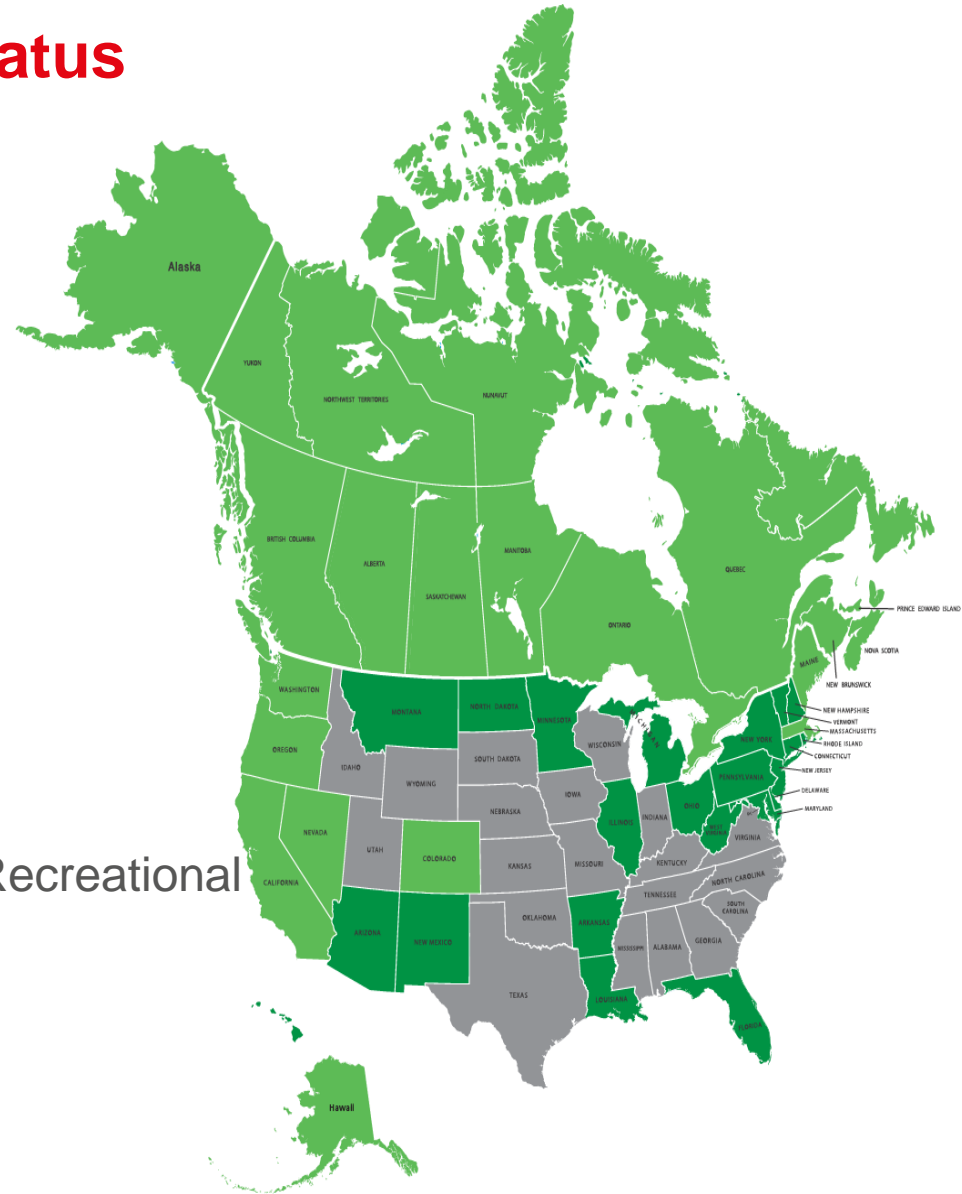

- The final wording was still under discussion but a “likely” date for the official effect of the legislation has been widely publicized as 1 July 2018. The provinces will have the power to determine the method of distribution and sale.

 Recreational

Marijuana Legalization Status

- Medical Marijuana Legalized
- Marijuana Legalized for Medical & Recreational
- No Laws Legalizing Marijuana

A Very Different Industry With Unique Challenges

- Lack of experience within the engineering community
- Lack of HVAC experience in the operator community
- Lack of consensus within the grower community
- Latent cooling , latent cooling, and latent cooling

My Personal Experience So Far, a Very Steep and Confusing Learning Curve

- We have supplied equipment to multiple grow facilities over the last 4 years
- Sought out experts to educate myself so I can assist engineers
- Initially modified 5 ton data center CRAC units to better suit the grow space
- Partnered with an industry leader (MMT)
- We are now modifying larger units to meet the needs of a changing industry (Dual circuit, up to 30 tons) , the rooms are getting larger
- Mostly dirt farming, aeroponics and hydroponics are out there as well
- Greenhouses seem to add additional challenges

A Growers Biggest concerns

- Thermally stressed plants
- White mold or Mildew
- Pests
- Cross contamination between strains or rooms
- Economic impact of the loss of a room
- Continuation of a strain

To Understand the Environmental Requirements You Must Understand the Plant

- Life cycle
- Transpiration rates
- Impact of elevated levels of CO²
- Lighting needs

Cannabis Cycle with Room Typical Requirements

- Mother room 23.9°C (75°F) 40%RH
- Clone room 26.7°C (80°F) 75%RH
- Veg room 23.9°C (75°F) 50%RH
- Flower room 22.2°C (72°F) 55%RH
- Curing room 23.9°C (75°F) 35%RH
- 63 days clone to harvest

Mother Room

- Mother room

23.9°C (75°F) 40%RH

Clone Room, The Nursery

- Clone room

26.7°C (80°F) 75%RH

Vegetative Room, Veg Room

- Vegetative room

23.9°C (75°F) 50%RH

Flowering Room, Bloom Room

- Flowering room

22.2°C (72°F) 55%RH

Drying Room, Curing Room

- Curing room 23.9°C (75°F) 35%RH Dew Point 7.5°C (45.5°F)

Types of Systems

- Direct Expansion
- Chilled Water
- Desiccant dehumidification
- Ultrasonic or steam canister humidification
- Requires tight control of conditions
- CO_2 control system
- Air scrubbers
- Combinations of multiple types of units

Custom Medical Cannabis Features

- Enhanced dehumidification

Custom Medical Cannabis Features

- Ultraviolet lighting

Custom Medical Cannabis Features

- CO² monitoring, Control, and alarms

What Information Does a Engineer Need?

| | |
|------------------|-----------------|
| Project name | Green Leaf Inc. |
| Project location | Denver, CO. |
| Date | October 10 2016 |

| Type of room | Mother | Clone | Vegitative | Flowering |
|--------------------------------|--------|-------|------------|-----------|
| Lights on duration (hours) | 12 | 18 | 18 | 12 |
| Number of plants per room | 25 | 200 | 200 | 200 |
| Room design conditions | | | | |
| Room design dry bulb temp ("F) | 70 | 75 | 74 | 74 |
| Room design RH (%) | 45 | 45 | 45 | 45 |
| Room dimensions | | | | |
| Room width (ft) | 20 | 20 | 20 | 20 |
| Room legnth (ft) | 15 | 40 | 40 | 40 |
| Room height (ft) | 12 | 12 | 12 | 12 |
| Calculated floor area (Ft^2) | 300 | 800 | 800 | 800 |
| Calculated room value (FT^3) | 3600 | 9600 | 9600 | 9600 |

| | | | | |
|--|--------|--------|--------|--------|
| Water and lighting | | | | |
| Net water use | 12.5 | 100 | 100 | 100 |
| Watering technique | Batch | Batch | Batch | Batch |
| (Batch, Drip, Areoponics, Hydroponics) | | | | |
| Lighting output per room | 13.2 | 35.2 | 35.2 | 35.2 |
| Type of lighting | HPS | HPS | HPS | HPS |
| Design requiremnts | | | | |
| Room tightness | Medium | Medium | Medium | Medium |
| (Tight, Medium, loose) | | | | |
| Type of heat rejection | Air | Air | Air | Air |
| Design summer ambient ("F) | 95 | 95 | 95 | 95 |
| Design winter ambient ("F) | 0 | 0 | 0 | 0 |

Vapor Pressure Deficit

| °C | °F | 100% | 95% | 90% | 85% | 80% | 75% | 70% | 65% | 60% | 55% | 50% | 45% | 40% | 35% |
|----|------|------|-----|-----|-----|------|------|------|------|------|------|------|------|------|------|
| 15 | 59 | 0.0 | 0.8 | 1.7 | 2.5 | 3.4 | 4.2 | 5.1 | 5.9 | 6.8 | 7.6 | 8.5 | 9.4 | 10.2 | 11.1 |
| 16 | 60.8 | 0.0 | 0.9 | 1.8 | 2.8 | 3.7 | 4.6 | 5.5 | 6.4 | 7.3 | 8.2 | 9.1 | 10.0 | 10.9 | 11.8 |
| 17 | 62.6 | 0.0 | 1.0 | 2.0 | 2.9 | 3.9 | 4.9 | 5.8 | 6.8 | 7.8 | 8.8 | 9.7 | 10.6 | 11.6 | 12.6 |
| 18 | 64.4 | 0.0 | 1.0 | 2.0 | 3.1 | 4.1 | 5.1 | 6.2 | 7.2 | 8.2 | 9.3 | 10.3 | 11.3 | 12.4 | 13.4 |
